

BRAIN TOOLS
When Brain Really Drives

Ideas generator – Technologies integrator

BRAIN TOOLS GROUP

Company Profile

Brain Tools LLC, a partnership company established in 2011 with long experienced supervisors for a main target: Research and Development for both products and projects.

Brain Tools was an old idea, kept warm till it became mature enough to fly, and reach to all who aim to both traditional and untraditional solutions in Medical field, Irrigation, Industry, Ecology, Education, Domestic and other.

Through innovative and long term scientific studies, market needs, economic analysis and plausibility of solutions, **Brain Tools** is growing in a stable and increasing rate towards leaving a finger print in the market.

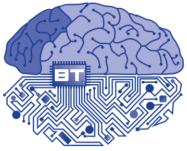

Thanks to more than 20 years of the experience in different areas **Brain Tools** team is able to offer planning, marketing and technical solutions.

Successful activity of the first years made it possible to open a new branch in Italy despite the critical international economic situation.

Embrace between the ideas, innovative technologies, customers' needs, open minded mentality and creativity allows us to propose our clients something special and full-satisfactory.

Huge experience of our experts drives us to join the knowledge in different fields and take the best from each one. Nevertheless, it allows us to remain highly specialized and creative approach guides us to find original solutions and not to be limited with the existing achievements.

Continuous study and development make us to provide the most updated view.

— Brain Tools' Mission:

*Integrate yesterday experience
to scale today
for a differentiated tomorrow.*

— Brain Tools' Vision:

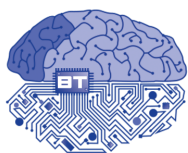

*We start
where other finished!*

— Brain Tools' Core Values:

*It's not the matter to compete
but also to complete.*

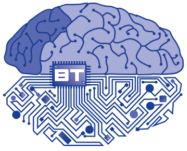

Brain Tools' activity is based on a 6 dimensional space with the following axes:

	Application axes					
	Industrial	Medical	Technical Services	Planning	Scientific Studies	Domestic
Organization and management	✓	✓	✓	✓	✓	✓
Infection control solution including Sterilization, Disinfection Equipment management	✓	✓		✓		
Biohazardous waste treatment	✓		✓	✓		
Validation and Scientific Services	✓		✓	✓		
Water treatment	✓	✓	✓	✓		✓
IT Solutions	✓	✓	✓	✓	✓	✓
Electronics and Automation Solutions	✓	✓	✓	✓	✓	✓
Robotics	✓	✓	✓	✓		
Automation	✓	✓	✓	✓	✓	✓
Medical Gases	✓		✓	✓		
Medical Furniture	✓		✓	✓		
Technological improvements	✓	✓	✓	✓	✓	
Processes management systems for quality, safety, environment	✓	✓	✓	✓	✓	
Maintenance	✓	✓	✓	✓		
Products safety	✓	✓	✓			
Security and safety systems	✓	✓		✓	✓	✓
Qualification and Training Services	✓	✓	✓	✓	✓	

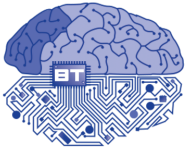

Every axis includes research and development, manufacturing, testing, marketing and sales, training, maintenance and post-supply assistance and consultancy.

Brain Tools designs and produces its own products and systems as well as helps in development other companies ensuring wide range of efficient services.

The 6-dimensional space of **Brain Tools**, in base of the application axis, can be defined as following:

1. **Research and development:** starts from the market needs and competitors study, new product/ system definition, new ideas introduction, technology integration, design of new intelligent device / system through mechanical, electrical, electronic and software development and engineering drawings. Once the new product / system is defined, we start the step of its realization by production compatibility analysis, project management, prototype follow up, testing and validation, production start-up and flow definition.
2. **Manufacturing** activity which is focused on medical furniture can be specified as following:
 - ⇒ Design and manufacturing of machinery, equipment, devices, control units and their parts,
 - ⇒ Design and construction of plants and their parts, whether industrial or not, for "turnkey" solutions for automated batching plants such as cement, fertilizers and poultry feed, and customized advanced irrigation systems for green houses, landscape, sport cities, open play grounds and stadiums.
3. **Testing** is performed by means of planning and following up of different activities connected to testing, inspection, measurement and validation of the products and systems, as well as advising and providing proper validation devices.
4. **Marketing and Sales** include:
 - ⇒ Company and product images creation can be explained in development and management of necessary tools and channels for best positioning on the market using different media tools such as websites, social networks set up and management, advertising videos, catalogues, gadgets, as well as exhibitions and promotional events preparation.
 - ⇒ Internationalization and businesses localization concretizes in company and product positioning, market definition, strategy definition and planning, local partners research, assistance in negotiations and contracts.

The sales and marketing activity for Medical axis is concentrated in turn-key formula, providing:

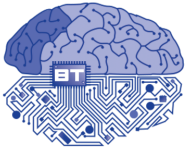

- complete solution for modular or digital clean operating rooms,
- surgical rooms equipment with all medical devices and medical gases set up for full operation,
- medical devices and furniture for hospitals, laboratories and clinics including equipment for operating theaters, ICU/CCU/NICU, emergency, labor and delivery, examination rooms and hospital wards,
- medical gases solutions, medical gases outlets and bed head units,
- dental units,
- mobile disinfection devices,
- sterilization devices,
- EEG & EMG units.

Our work includes : Marketing, tender analysis, complete offer submittal, consultancy on technical and financial offer, business follow up and business successful closing.

5. Training is performed on-site and remotely, and includes study and explanation of the technical documentation, user documentation, maintenance documentation, software and practical skills development.

6. Maintenance and post-supply assistance:

- ⇒ Despite standard maintenance services, Brain Tools provides its own Remote Maintenance System which can be customized according to the application.
- ⇒ The Smart Managers were developed to help the people in different fields to keep easy the management of the complex systems so that the personnel can dedicate more time for more important subjects while our Smart Managers will make their daily work automatically. They include BTIOS (BT Industrial Operating System), BT RMS (BT Remote Maintenance System), BT VSPMS (BT Virtual Spare Parts and Maintenance System), BT EasyTrack (tracking system for the equipment), BT EasySafe (Top level filter of permissions and accesses using bar code reader, magnetic, finger print, eye-scan, voice recognition etc.)

7. Consultancy, in base of the application, can be specified as following:

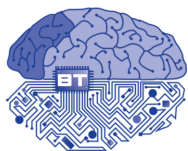

Technical consultancy consists of:

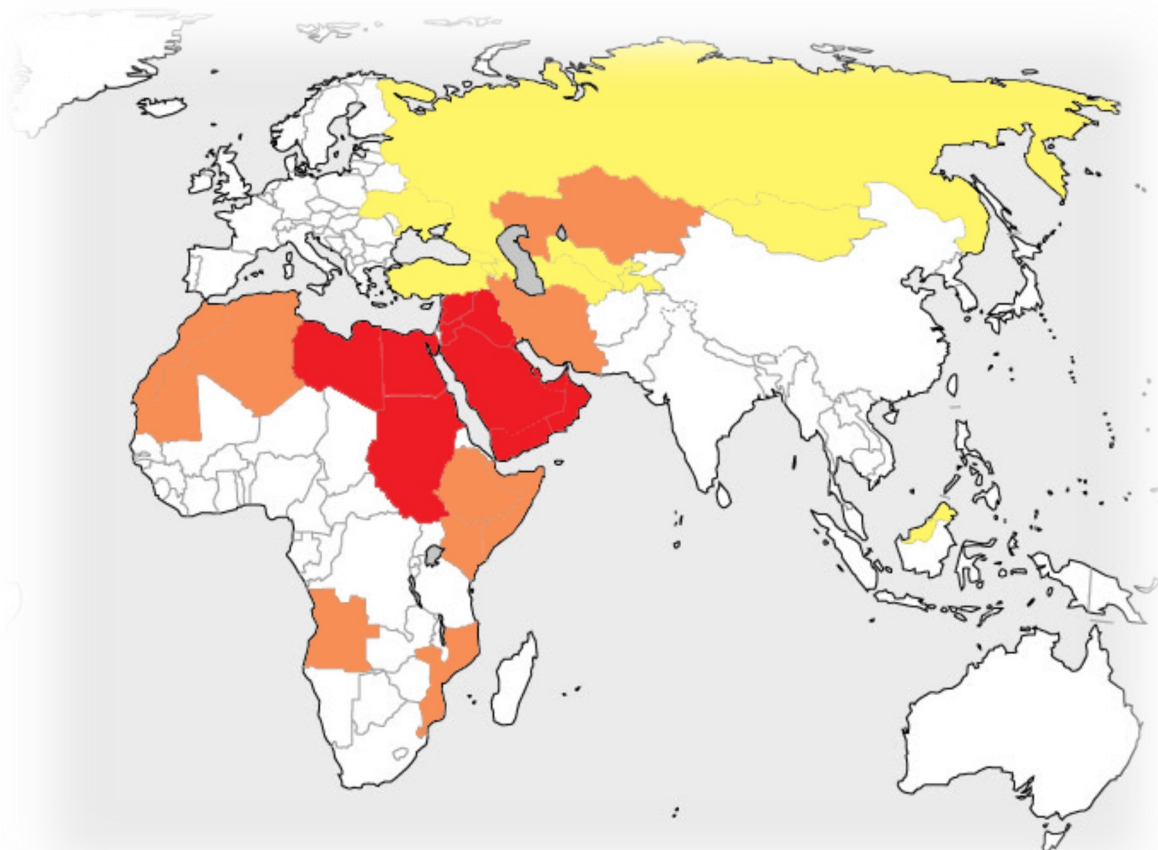

- ⇒ Execution of feasibility studies, research and development, consulting, design and construction management, evaluations of technical, economic and environmental impact studies,
- ⇒ Integrated technical services of surveyors, engineers and architects and technical consultants,
- ⇒ Customized solutions for open web connectivity
- ⇒ Services in the field of testing, inspection, measurement and validation of the product and system.

Hospital consultancy includes different kind of services connected to hospital and medical planning, infection control solution including sterilization, disinfection equipment and infectious waste treatment, design from A to Z of special purpose clinics as a part of its vision in turnkey solution, BOQ and room-by-room layout, infection control, SOP, medical devices, Hospital Information System (HIS), RFID and GPS solutions for medical and laboratory applications.
